

Pet Symptom Diary

One line per observation, written the day it happens. Vets ask about onset, frequency, duration, severity, and whether things are improving — dated notes answer all five.

Date & time	What happened (be specific)	Eating / drinking	Bathroom	Better / worse?

Film intermittent symptoms (limping, coughing, odd breathing) when they happen — video beats description. Call your veterinarian now for: labored breathing, repeated vomiting, straining without producing urine, collapse, or a cat not eating for 24 hours.
